

Section 3. Water rights. (1) All existing rights to the use of any waters for any useful or beneficial purpose are hereby recognized and confirmed.

(2) The use of all water that is now or may hereafter be appropriated for sale, rent, distribution, or other beneficial use, the right of way over the lands of others for all ditches, drains, flumes, canals, and aqueducts necessarily used in connection therewith, and the sites for reservoirs necessary for collecting and storing water shall be held to be a public use.

(3) All surface, underground, flood, and atmospheric waters within the boundaries of the state are the property of the state for the use of its people and are subject to appropriation for beneficial uses as provided by law.

(4) The legislature shall provide for the administration, control, and regulation of water rights and shall establish a system of centralized records, in addition to the present system of local records.

Water Judges, Title 3, ch. 7, part 2.

Duties of water masters, 3-7-311.

Reserved Water Rights Compact Commission, Title 85, ch. 2, part 7.

85-2-232. Availability of temporary preliminary or preliminary decree. (1) (a) The water judge shall send to the department a copy of a temporary preliminary decree or preliminary decree issued for a basin.

(b) The water judge shall serve by mail a notice of availability of the temporary preliminary decree or preliminary decree to each person who has filed a claim of existing right within the decreed basin or to that person's successor as documented in the department's records.

(c) The water judge shall also serve by mail a notice of availability of the temporary preliminary decree or preliminary decree to the purchaser under contract for deed, as defined in 70-20-115, of property in connection with which a claim of existing right has been filed within the decreed basin.

(d) In the Powder River basin, the water judge shall serve by mail a notice of availability of the temporary preliminary decree or preliminary decree to each person or to that person's successor as documented in the department's records, who has filed a declaration of an existing right.

(e) The water judge shall enclose with a notice required under subsections (1)(b) through (1)(d) an abstract of the disposition of the claimed or declared existing right of a person identified in this section or that person's successor as documented in the department's records.

(f) The notice of availability required under this section must also be served upon:

(i) those issued or having applied for and not having been denied a permit to beneficially use water within the decreed basin pursuant to Title 85, chapter 2, part 3;

(ii) those granted a reservation within the decreed basin pursuant to 85-2-316; or

(iii) other interested persons who request service of the notice from the water judge.

(g) When the water court provides notice to claimants of the opportunity to object, it shall include information explaining the right to appeal a water court decision as provided in 85-2-235.

(2) The clerk or person designated by the water judge to mail the notice shall make a general certificate of mailing certifying that a copy of the notice has been placed in the United States mail, postage prepaid, addressed to each party required to be served notice of the temporary preliminary decree or preliminary decree. The certificate is conclusive evidence of legal notice of entry of decree.

(3) Notice of the availability of a preliminary decree must also be published at least once each week for 3 consecutive weeks in at least three newspapers of general circulation that cover the water division or divisions in which the decreed basin is located. This notice must be provided before the final decree for the basin is issued.

(4) A person may obtain a copy of the temporary preliminary decree or preliminary decree upon payment of a fee of \$20 or the cost of printing, whichever is greater, to the water judge. The fee must be deposited in the state general fund.

Service, Rule 4D, M.R.Civ.P. (see Title 25, ch. 20).

Department duties, 85-2-112

85-2-316. State reservation of waters. (1) The state, any political subdivision or agency of the state, or the United States or any agency of the United States may apply to the department to acquire a state water reservation for existing or future beneficial uses or to maintain a minimum flow, level, or quality of water throughout the year or at periods or for a length of time that the department designates.

(2) (a) Water may be reserved for existing or future beneficial uses in the basin where it is reserved, as described by the following basins:

(i) the Clark Fork River and its tributaries to its confluence with Lake Pend Oreille in Idaho;

(ii) the Kootenai River and its tributaries to its confluence with Kootenay Lake in British Columbia;

(iii) the St. Mary River and its tributaries to its confluence with the Oldman River in Alberta;

(iv) the Little Missouri River and its tributaries to its confluence with Lake Sakakawea in North Dakota;

(v) the Missouri River and its tributaries to its confluence with the Yellowstone River in North Dakota; and

(vi) the Yellowstone River and its tributaries to its confluence with the Missouri River in North Dakota.

(b) A state water reservation may be made for an existing or future beneficial use outside the basin where the diversion occurs only if stored water is not reasonably available for water leasing under 85-2-141 and the proposed use would occur in a basin designated in subsection (2)(a).

(3) (a) The department shall adopt rules that are necessary to determine whether or not an application is correct and complete based on the provisions applicable to issuance of a state water reservation. The rules must be adopted in compliance with Title 2, chapter 4.

(b) An applicant shall submit a correct and complete application. The determination of whether an application is correct and complete must be based on rules adopted under this subsection (3) that are in effect at the time the application is submitted. The department shall proceed in accordance with 85-2-302 with regard to any defects in the application.

(c) The application must be made on a form prescribed by the department. The department shall make the forms available through its offices.

(d) Upon receiving a correct and complete application, the department shall proceed in accordance with 85-2-307 through 85-2-309. After the hearing provided for in 85-2-309, the department shall decide whether to reserve the water for the applicant. The department's costs of giving notice, holding the hearing, conducting investigations, and making records incurred in acting upon the application to reserve water, except the cost of salaries of the department's personnel, must be paid by the applicant. In addition, a reasonable proportion of the department's cost of preparing an environmental analysis must be paid by the applicant unless waived by the department upon a showing of good cause by the applicant.

(4) (a) Except as provided in 85-20-1401, the department shall issue a state water reservation if the applicant establishes to the department by a preponderance of evidence:

- (i) the purpose of the reservation;
- (ii) the need for the reservation;
- (iii) the amount of water necessary for the purpose of the reservation;
- (iv) that the reservation is in the public interest.

(b) In determining the public interest under subsection (4)(a)(iv), the department shall issue a water reservation for withdrawal and transport for use outside the state if the applicant proves by clear and convincing evidence that:

- (i) the proposed out-of-state use of water is not contrary to water conservation in Montana; and
- (ii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(c) In determining whether the applicant has proved by clear and convincing evidence that the requirements of subsections (4)(b)(i) and (4)(b)(ii) are met, the department shall consider the following factors:

- (i) whether there are present or projected water shortages within the state of Montana;
- (ii) whether the water that is the subject of the application could feasibly be transported to alleviate water shortages within the state of Montana;
- (iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and
- (iv) the demands placed on the applicant's supply in the state where the applicant intends to use the water.

(d) When applying for a state water reservation to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation, lease, use, and reservation of water.

(5) If the purpose of the state water reservation requires construction of a storage or diversion facility, the applicant shall establish to the department by a preponderance of evidence that there will be progress toward completion of the facility and accomplishment of the purpose with reasonable diligence in accordance with an established plan.

(6) The department shall limit any state water reservations after May 9, 1979, for maintenance of minimum flow, level, or quality of water that it awards at any point on a stream or river to a maximum of 50% of the average annual flow of record on gauged streams. Ungauged streams are not subject to the limit under this subsection.

(7) A state water reservation issued under this section has a priority of appropriation dating from the filing of a correct and complete application with the department.

(8) (a) A person desiring to use water reserved to a conservation district for agricultural purposes shall make application for the use with the district, and the district, upon approval of the application, shall inform the department of the approved use and issue the applicant an authorization for the use. The department shall maintain records of all uses of water reserved to conservation districts and be responsible, when requested by the districts, for rendering technical and administrative assistance within the department's staffing and budgeting limitations in the preparation and processing of the applications for the conservation districts. The department shall, within its staffing and budgeting limitations, complete any feasibility study requested by the districts within 12 months of the time that the request was made. The

department shall extend the time allowed to develop a plan identifying projects for using a district's reservation as long as the conservation district makes a good faith effort, within its staffing and budget limitations, to develop a plan.

(b) Upon actual application of water to the proposed beneficial use, the authorized user shall notify the conservation district. The notification must contain a certified statement by a person with experience in the design, construction, or operation of project works for agricultural purposes describing how the reserved water was put to use. The department or the district may then inspect the appropriation to determine if it has been completed in substantial accordance with the authorization.

(9) A state water reservation issued under this section may not adversely affect any rights in existence at that time. The department may issue a state water reservation subject to terms, conditions, restrictions, and limitations it considers necessary to satisfy the criteria of this section.

(10) Upon issuing a state water reservation for the purpose of maintaining a minimum flow, level, or quality of water, the appropriation of water is complete. Except as provided in 85-20-1401, the department shall, periodically but at least once every 10 years, review existing state water reservations to ensure that the objectives of the reservations are being met. When the objectives of a state water reservation are not being met, the department may extend, revoke, or modify the reservation. Any undeveloped water made available as a result of a revocation or modification under this subsection is available for appropriation by others pursuant to this part.

(11) Except as provided in 85-20-1401, the department may modify an existing or future order originally adopted to reserve water for the purpose of maintaining minimum flow, level, or quality of water, so as to reallocate the state water reservation or portion of the reservation to an applicant who is a qualified reservant under this section. Reallocation of water reserved pursuant to a state water reservation may be made by the department following notice and hearing if the department finds that all or part of the reservation is not required for its purpose and that the need for the reallocation has been shown by the applicant to outweigh the need shown by the original reservant. Reallocation of reserved water may not adversely affect the priority date of the reservation, and the reservation retains its priority date despite reallocation to a different entity for a different use. The department may not reallocate water reserved under this section on any stream or river more frequently than once every 5 years.

(12) A reservant may not make a change in a state water reservation under this section, except as permitted under 85-2-402 and this subsection. If the department approves a change, the department shall give notice and require the reservant to establish that the criteria in subsection (4) will be met under the approved change.

(13) A state water reservation may be transferred to another entity qualified to hold a reservation under subsection (1). Only the entity holding the reservation may initiate a transfer. The transfer occurs upon the filing of a water right ownership update form with the department, together with an affidavit from the entity receiving the reservation establishing that the entity is a qualified reservant under subsection (1), that the entity agrees to comply with the requirements of this section and the conditions of the reservation, and that the entity can meet the objectives of the reservation as granted. If the transfer of a state water reservation involves a change in an appropriation right, the necessary approvals must be acquired pursuant to subsection (12).

(14) This section does not vest the department with the authority to alter a water right that is not a state water reservation.

(15) The department shall undertake a program to educate the public, other state agencies, and political subdivisions of the state as to the benefits of the state water reservation process and the procedures to be followed to secure the reservation of water. The department shall provide technical assistance to other state agencies and political subdivisions in applying for reservations under this section.

(16) Water reserved under this section is not subject to the state water leasing program established under 85-2-141.

History: En. Sec. 26, Ch. 452, L. 1973; amd. Sec. 11, Ch. 485, L. 1975; amd. Sec. 7, Ch. 416, L. 1977; R.C.M. 1947, 89-890; amd. Sec. 1, Ch. 689, L. 1979; amd. Sec. 1, Ch. 186, L. 1981; amd. Sec. 6, Ch. 357, L. 1981; amd. Sec.

85-2-702. Negotiation with Indian tribes. (1) The reserved water rights compact commission, created by 2-15-212, may negotiate with the Indian tribes or their authorized representatives jointly or severally to conclude compacts authorized under 85-2-701. Compact proceedings must be commenced by the commission. The commission shall serve by certified mail directed to the governing body of each tribe a written request for the initiation of negotiations under this part and a request for the designation of an authorized representative of the tribe to conduct compact negotiations. Compact negotiations commence upon receipt of the written designation from the governing body of a tribe.

(2) When the compact commission and the Indian tribes or their authorized representatives have agreed to a compact, they shall sign a copy and file an original copy with the department of state of the United States of America and copies with the secretary of state of Montana and with the governing body for the tribe involved. The compact is effective and binding upon all parties upon ratification by the legislature of Montana and any affected tribal governing body, and approval by the appropriate federal authority.

(3) Upon its ratification by the Montana legislature and the tribe, the terms of a compact must be included in the preliminary decree as provided by 85-2-231, and unless an objection to the compact is sustained under 85-2-233, the terms of the compact must be included in the final decree without alteration. However, if approval of the state legislature and the tribe has not been

accomplished by July 1, 2013, all Indian claims for reserved water rights that have not been resolved by a compact must be filed with the department within 24 months. These new filings must be used in the formulation of the preliminary decree and must be given treatment similar to that given to all other filings.

History: En. Sec. 27, Ch. 697, L. 1979; amd. Sec. 8, Ch. 268, L. 1981; amd. Sec. 6, Ch. 667, L. 1985; amd. Sec. 2, Ch. 358, L. 1987; amd. Sec. 3, Ch. 784, L. 1991; amd. Sec. 2, Ch. 44, L. 1997; amd. Sec. 2, Ch. 103, L. 2003; amd. Sec. 2, Ch. 5, L. 2009.

Compiler's Comments

2009 Amendment: Chapter 5 in (3) in second sentence near middle extended approval date from July 1, 2009, to July 1, 2013, and at end before "months" substituted "24" for "6". Amendment effective February 19, 2009.
